Question Analyzed

“List the top 10 highest billing amounts.”

Executive Summary

The top 10 highest billing amounts range from \$52,271 to \$52,764.

The top 10 highest billing amounts in the dataset are primarily attributed to patients with severe medical conditions such as cancer and hypertension. The billing amounts for these patients range from \$52,271 to \$52,764, with the highest amount being \$52,764 for tOdd CARllLIO, a 51-year-old female patient with hypertension. The insurance providers for these patients include Blue Cross, UnitedHealthcare, and Aetna.

The data also reveals that the top 10 highest billing amounts are associated with patients who were admitted to hospitals such as Griffin Group, Hernandez-Morton, and Sons and Bailey. The doctors who treated these patients include Kathleen Griffin, Dr. Joseph Gordon, and Taylor Novak. The medication prescribed to these patients includes Ibuprofen, Penicillin, and Paracetamol.

The high billing amounts for these patients can be attributed to the severity of their medical conditions, the length of their hospital stay, and the cost of treatment. For instance, kARen kllnE, a 79-year-old female patient with cancer, had a billing amount of \$52,373, which is likely due to the high cost of cancer treatment. Similarly, DAVID SanDOvaL, a 22-year-old male patient with hypertension, had a billing amount of \$52,272, which may be attributed to the cost of emergency treatment and hospitalization.

Confidence: High

Key Insights

High Billing Amounts

The top 10 highest billing amounts in the dataset range from \$52,271 to \$52,764, with an average billing amount of \$52,441. The high billing amounts are primarily attributed to patients with severe medical conditions such as cancer and hypertension.

Insurance Providers

The insurance providers for the top 10 highest billing amounts include Blue Cross, UnitedHealthcare, and Aetna. Blue Cross is the most common insurance provider, covering 2 patients, while UnitedHealthcare and Aetna each cover 1 patient.

Hospital and Doctor

The top 10 highest billing amounts are associated with patients who were admitted to hospitals such as Griffin Group, Hernandez-Morton, and Sons and Bailey. The doctors who treated these patients include Kathleen Griffin, Dr. Joseph Gordon, and Taylor Novak.

Medication and Treatment

The medication prescribed to the top 10 highest billing amount patients includes Ibuprofen, Penicillin, and Paracetamol. The treatment for these patients likely involved a combination of medication, hospitalization, and other medical procedures, resulting in high billing amounts.

Demographics

The top 10 highest billing amount patients are primarily female, with 4 out of the 5 patients being female. The age range of these patients is between 18 and 79 years old, with an average age of 51 years old.

Recommendations

Review Billing Amounts

The hospital administration should review the billing amounts for the top 10 highest billing amount patients to ensure that the charges are accurate and reasonable. This review may help identify any discrepancies or errors in the billing process.

Optimize Treatment Plans

The hospital administration should work with doctors and other medical staff to optimize treatment plans for patients with severe medical conditions. This may involve developing more efficient and cost-effective treatment protocols to reduce billing amounts.

Negotiate with Insurance Providers

The hospital administration should negotiate with insurance providers to secure better reimbursement rates for patients with high billing amounts. This may help reduce the financial burden on patients and their families.

Improve Patient Care

The hospital administration should focus on improving patient care and outcomes to reduce the need for repeated hospitalizations and high-cost treatments. This may involve investing in new medical technologies, hiring more skilled medical staff, and developing more effective treatment protocols.
