

Autonomous Data Analyst — Analysis Report

Session: d7c3e2b0-c3f2-4e7b-b656-76b569a4c0ca

Question Analyzed

“Top 3 custoemrs?”

Executive Summary

The system attempted to retrieve the top 3 customers from a non-existent table named 'uploaded_data_82017810', resulting in a failure due to the table not being found in the database.

The Autonomous Data Analyst Agent attempted to execute a SQL query to retrieve the top 3 customers from the 'uploaded_data_82017810' table. However, the table does not exist in the database, causing the query to fail. The agent attempted to execute the query multiple times, but the result was the same each time. The root cause of the failure is the non-existence of the specified table. To fix this issue, the user should ensure that the table exists in the database and that the table name is correctly specified in the query.

Confidence: Low

Key Insights

Non-Existent Table

The 'uploaded_data_82017810' table does not exist in the database, causing the SQL query to fail.

Recommendations

Verify Table Existence and Name

Ensure that the 'uploaded_data_82017810' table exists in the database and that the table name is correctly specified in the query. If the table does not exist, create it or use an existing table that contains the required customer data.
