

Autonomous Data Analyst Agent Report

Session: 78ede44b-65f2-48c2-9a91-96007d9c2d14

Question Analyzed

"Which month has more sales?"

Narrative Summary & Findings

****Monthly Sales Analysis****

Based on the executed query and data output, the month with the most sales is ****November****, as indicated by the month code '11'. The total sales for this month amount to ****\$2,118,885.67****.

Key findings from the analysis include:

- * The query aggregated sales data by month, allowing for a direct comparison of sales performance across different months.
- * The results were sorted in descending order by total sales, ensuring that the month with the highest sales is prominently displayed.
- * The `LIMIT 1` clause was used to retrieve only the top-performing month, providing a clear answer to the user's question.

In summary, ****November**** is the month with the most sales, with a total of ****\$2,118,885.67**** in sales. This insight can be useful for businesses to identify peak sales periods and plan accordingly.
