

Autonomous Data Analyst Agent Report

Session: c338225a-1e67-4053-8589-c4828db50fa0

Question Analyzed

"Plot monthly sales trend."

Narrative Summary & Findings

****Diagnostic Summary: Plotting Monthly Sales Trend****

The Autonomous Data Analyst Agent attempted to analyze your question, "Plot monthly sales trend," and generate a visualization to display the trend. To achieve this, the agent executed a SQL query to extract and group monthly sales data from your uploaded dataset (`uploaded\_data\_685b6c80`).

The query used the `date\_trunc` function to truncate the `ORDERDATE` column to the month level and the `SUM` aggregation function to calculate `TOTAL\_SALES` for each month. The results were then ordered by the `MONTH` column.

****Key Failure Points:****

- **Plotly Chart Configuration JSON Generation**:** The agent failed to generate the required Plotly chart configuration JSON file (`chart.json`) in all four attempts. This file is necessary for creating the visualization.
- **Visualization Generation**:** Despite successful execution of the SQL query, the agent was unable to create the desired visualization due to the missing Plotly chart configuration JSON file.

****Constructive Suggestions:****

To improve the chances of successful visualization, please consider the following:

- **Verify Data Integrity**:** Ensure that your uploaded dataset (`uploaded\_data\_685b6c80`) contains the required columns, including `ORDERDATE` and `SALES`, with the correct data types and formats.
- **Check Date Format**:** Confirm that the `ORDERDATE` column is in the correct format (`'%m/%d/%Y %H:%M'`) to avoid any potential issues with date parsing.
- **Provide Additional Context**:** If you have any specific requirements or preferences for the visualization (e.g., chart type, colors, or labels), please provide additional context in your next query.
- **Upload Updated Dataset**:** If you've made any changes to your dataset, please upload the updated version to ensure the agent is working with the latest data.

By addressing these potential issues and providing more context, you can help the Autonomous Data Analyst Agent better understand your requirements and generate the desired visualization for your monthly sales trend.
